Welcome to the Historic Hotel Vance. Originally built in 1872 by lumberman, John Vance, it was the first building in Eureka with electricity. It was redesigned and enlarged in 1910 and in 1998 a complete rehabilitation of the main hotel and it's annex began. The buildings are now a beautifully restored Victorian retail and office complex. The Hotel Vance currently houses retail shops and restaurants on the ground floor with commercial space on its second, third and fourth floors.
